Session overview:

Many of you will have heard about 'Lean-agile procurement', but what is it really about and what opportunities does it present?

This round-table will address these and other questions such as:

- What is new or different about it?
- When might it be applicable?
- What is the Lean Procurement Canvas?
- What sort of benefits and outcomes would you expect through adopting LAP?
- What skills or capabilities do you need to run a lean-agile procurement event?
- What are the opportunities and challenges that LAP presents?

The round-table will be led by a member of the Pareto/PASA team who has completed the Lean-agile Procurement Certification workshop delivered by the founder of the movement, Mirko Kleiner.

Please submit any specific questions you can think of that you would like to discuss, when registering.

Agenda items/Pre submitted questions:

- Speed to market tech POC's / POV's whilst managing risks (Liz Eylander – Medibank)
- The comparison between classic procurement and lean agile procurement (Alysa Febria)
- How to use lean agile procurement in the tender process (end to end) (Alysa Febria)
- What are the unique benefits of Agile Procurement- i means the benefits which could not be achieved via conventional procurement? (Mary Zhou – Santos)
- What is the difference between agile procurement and the way we practise procurement traditionally? (Morgan Taheri – Santos)
- Just looking to familiarise myself with common thinking about what "agile" procurement really means (Andrew Peacock – La Trobe University)
- New to procurement and would love some background on Lean-agile procurement, as I may be one of the few that has not heard about it (Edward Fowler – Pernod Ricard Winemakers)
